PROFESSIONAL SUMMARY

QA Analyst with 1+ year of experience at a healthtech startup, promoted from QA Intern to a full-time role. Tests complete user journeys across Android, iOS, web and APIs, with a focus on money flows (wallet coins, refunds, collections), multi-plan signups and bookings. **Found 700+ bugs** across frontend and backend, including critical issues, and **wrote 1000+ test cases**. Builds Page Object Model automation in Java + Appium that runs on BrowserStack real devices through GitHub Actions, and uses AI tools to speed up test design and debugging.

WORK EXPERIENCE

Quality Assurance Analyst (Full-time) — HummCare (Humm Info Care Pvt. Ltd.) Apr 2026 – Present

Mumbai · Hybrid · Promoted from QA Intern

- **Wallet coins (5+ features):** Tested how coins are earned, redeemed, tracked and expired under many rules, including boundary and expiry edge cases. Documented each flow from the user's point of view and **found 120+ bugs** across frontend and backend, including critical ones.
- **Refunds and collections (4+ features):** Tested the full flow and logic across every status (pending, success, failed, partial), and reviewed every UI message so users know what happened and what to do next.
- **Backend validation:** Verified wallet balances, refunds, coin expiry and user plans in the Django admin panel and internal dashboards, and tested REST APIs in Postman, catching mismatches between what the app showed and what the backend stored.
- **Test automation and CI/CD:** Built a Page Object Model (POM) suite in Java + Appium for flows re-checked every release, such as booking. Runs on BrowserStack real devices through GitHub Actions, with weekly night runs plus on-demand triggers, and saves reports, screenshots and videos for every run.
- **Performance and security:** Ran load, stress and spike tests in Apache JMeter to find bottlenecks before release, and MobSF static scans on Android builds against the OWASP Mobile Top 10.
- **AI-assisted testing:** Used AI tools to draft test cases and edge cases from user stories (e.g. coin expiry, partial refunds), generate test data and debug flaky locators, reviewing every output before use.

QA Intern — HummCare (Humm Info Care Pvt. Ltd.) Sep 2025 – Mar 2026

Mumbai · Hybrid

- **Complex signup:** Tested 8+ signup types, each mapped to a different plan package, and confirmed every user received the correct package and access.
- **Booking flow:** Tested the end-to-end journey (slot selection, payment, family members, reschedule, cancel) on Android, iOS and web.
- **Test documentation and bug tracking:** Wrote functional, regression, smoke, sanity and edge test cases in Excel, and bug reports with steps, severity and video evidence, tracked in Jira, ClickUp and OpenProject.
- **Release checks:** Ran UI checks before each release for layout, wording and consistency across platforms.

TECHNICAL SKILLS

Testing: Functional, Regression, Smoke, Sanity, Exploratory, End-to-End, UAT, Edge-case Testing

Automation & CI/CD: Java, Appium, Selenium, Playwright, Page Object Model (POM), BrowserStack, GitHub Actions

API, Performance & Security: Postman, REST API Testing, Apache JMeter (load, stress, spike), MobSF, OWASP Mobile Top 10

Backend & Data: Django Admin, Internal Dashboards, SQL, MySQL, Firebase

AI & LLM Testing: DeepEval, RAG evaluation, AI-assisted test design, test data generation, script debugging

Tools & Process: Jira, ClickUp, OpenProject, Git, GitHub, Excel, Agile/Scrum, Bug Lifecycle

Platforms: Android, iOS, Web, Cross-browser

CERTIFICATIONS

- Appium Mobile Automation · Postman and REST API Testing · Apache JMeter · GitHub Actions CI/CD with Git and GitHub
- ISTQB Certified Tester Foundation Level (CTFL) — in progress

EDUCATION

B.Sc. Computer Science — Pillai College of Arts, Commerce and Science, Panvel 2022 – 2025
